INDEX TO VOLUME 135

Alphabetical Table of Contents of Authors

AIELLO, LESLIE C. See ANDREW L. YOUNG

ALATALO, R. V., L. GUSTAFSSON, and A. LUNDBERG. Phenotypic selection on heritable size traits: environmental variance and genetic response, 464

ALSTAD, DONALD N. See CATHERINE LOUDON

ANDERSON, DAVID J. Evolution of obligate siblicide in boobies. 1. A test of the insurance-egg hypothesis, 334

ARMBRUSTER, W. SCOTT. Estimating and testing the shapes of adaptive surfaces: the morphology and pollination of *Dalechampia* blossoms, 14

ÅSTRÖM, MÅRTEN. See PER LUNDBERG

ATCHLEY, WILLIAM R. See DAVID E. COWLEY

AUSTAD, STEVEN N. See SARA M. LEWIS

BARBUJANI, GUIDO. See ROBERT R. SOKAL

BENNETT, WILLIAM A. Scale of investigation and the detection of competition: an example from the house sparrow and house finch introductions in North America, 725

BOTKIN, DANIEL B. See MARK V. WILSON

CHAI, PENG, and ROBERT B. SRYGLEY. Predation and the flight, morphology, and temperature of Neotropical rain-forest butterflies, 748. See also ROBERT B. SRYGLEY

COHEN, DAN, and REUVEN DUKAS. The optimal number of female flowers and the fruits-to-flowers ratio in plants under pollination and resources limitation, 218

COHEN, JOEL E., and ZBIGNIEW J. PALKA. A stochastic theory of community food webs. V. Intervality and triangulation in the trophic-niche overlap graph, 435

COLLINS, SCOTT L., and SUSAN M. GLENN. A hierarchical analysis of species' abundance patterns in grassland vegetation, 633

CONDIT, RICHARD, and BRUCE R. LEVIN. The evolution of plasmids carrying multiple resistance genes: the role of segregation, transposition, and homologous recombination, 573

COWLEY, DAVID E., and WILLIAM R. ATCHLEY. Development and quantitative genetics of correlation structure among body parts of *Drosophila melanogaster*, 242

CRESPI, BERNARD J. Measuring the effect of natural selection on phenotypic interaction systems, 32

CRESPI, BERNARD J., and PETER D. TAYLOR. Dispersal rates under variable patch density, 48

DE JONG, TOM J. See PETER G. L. KLINKHAMER

DUBUC, MICHELLE. See DANIEL J. SCHOEN

DUKAS, REUVEN. See DAN COHEN

EBELING, ALFRED W., SALLY J. HOLBROOK, and RUSSELL J. SCHMITT. Temporally concordant structure of a fish assemblage: bound or determined? 63

FAUTH, JOHN E. See HENRY M. WILBUR

FORTIN, MARIE-JOSÉE. See ROBERT R. SOKAL

FOX, GORDON A. Perennation and the persistence of annual life histories, 829

FRISTRUP, KURT M. See JOHN L. SPIESBERGER

GAINES, STEVEN D., and WILLIAM R. RICE. Analysis of biological data when there are ordered expectations, 310

GLAZIER, DOUGLAS S. Reproductive efficiency and the timing of gestation and lactation in rodents, 269

GLENN, SUSAN M. See SCOTT L. COLLINS
GUSTAFSSON, L. See R. V. ALATALO

HARDING, ROSALIND M. See ROBERT R. SOKAL
HASSELL, M. P. See M. E. HOCHBERG
HASSON, OREN. See RICHARD E. MICHOD
HOCHBERG, M. E., M. P. HASSELL, and R. M. MAY. The dynamics of host-parasitoid-pathogen interactions, 74
HOLBROOK, SALLY J. See ALFRED W. EBELING
HOLSINGER, KENT E., and STEPHEN W. PACALA. Multiple-niche polymorphisms in plant populations, 301

KADMON, RONEN, and AVI SHMIDA. Spatiotemporal demographic processes in plant populations: an approach and a case study, 382
KIM, JUNHYONG. See ROBERT R. SOKAL
KING, DAVID A. The adaptive significance of tree height, 809
KLINKHAMER, PETER G. L., TOM J. DE JONG, and EVERT MEELIS. How to test for proportionality in the reproductive effort of plants, 291
KRISHNAN, V. V. See JUDY A. STAMPS
KRUPA, JAMES. See ANDREW SIH

LEGENDRE, PIERRE. See ROBERT R. SOKAL
LESSIOS, H. A. Adaptation and phylogeny as determinants of egg size in echinoderms from the two sides of the Isthmus of Panama, 1
LEVIN, BRUCE R. See RICHARD CONDIT
LEVIN, DONALD A. The seed bank as a source of genetic novelty in plants, 563
LEWIS, SARA M., and STEVEN N. AUSTAD. Sources of intraspecific variation in sperm precedence in red flour beetles, 351
LIVELY, CURTIS M., and DAVID G. LLOYD. The cost of biparental sex under individual selection, 489
LLOYD, DAVID G. See CURTIS M. LIVELY
LOUDA, SVAŤA M. See KENNETH R. MCKAYE
LOUDON, CATHERINE, and DONALD N. ALSTAD. Theoretical mechanics of particle capture: predictions for hydropsychid caddisfly distributional ecology, 360
LUDWIG, DONALD, and LOCKE ROWE. Life-history strategies for energy gain and predator avoidance under time constraints, 686
LUNDBERG, A. See R. V. ALATALO
LUNDBERG, PER, and MÅRTEN ÅSTRÖM. Low nutritive quality as a defense against optimally foraging herbivores, 547

MAY, R. M. See M. E. HOCHBERG
MCKAYE, KENNETH R., SVAŤA M. LOUDA, and JAY R. STAUFFER, JR. Bower size and male reproductive success in a cichlid fish lek, 597
MEELIS, EVERT. See PETER G. L. KLINKHAMER
MICHOD, RICHARD E., and OREN HASSON. On the evolution of reliable indicators of fitness, 788
MORTON, EUGENE S. Habitat segregation by sex in the hooded warbler: experiments on proximate causation and discussion of its evolution, 319

ODEN, NEAL L. See ROBERT R. SOKAL

PACALA, STEPHEN W. See KENT E. HOLSINGER
PALKA, ZBIGNIEW J. See JOEL E. COHEN
PATTEN, BERNARD C. Path overcounting in indirect-effects analysis (Notice), 858
PEARMAN, PETER B., and HENRY M. WILBUR. Changes in population dynamics resulting from oviposition in a subdivided habitat, 708

RICE, WILLIAM R. See STEVEN D. GAINES
RICHARD, ALISON F. See ANDREW L. YOUNG
ROGERS, ALAN R. Group selection by selective emigration: the effects of migration and kin structure, 398
ROWE, LOCKE. See DONALD LUDWIG

SCHMID-HEMPEL, PAUL. Reproductive competition and the evolution of work load in social insects, 501
SCHMITT, RUSSELL J. See ALFRED W. EBELING
SCHOEN, DANIEL J., and MICHELLE DUBUC. The evolution of inflorescence size and number: a gamete-packaging strategy in plants, 841
SHINE, RICHARD. Proximate determinants of sexual differences in adult body size, 278

SHMIDA, AVI. See RONEN KADMON
SIH, ANDREW, JAMES KRUPA, and STEVEN TRAVERS. An experimental study on the effects of predation risk and feeding regime on the mating behavior of the water strider, 284
SOKAL, ROBERT R., NEAL L. ODEN, PIERRE LEGENDRE, MARIE-JOSÉE FORTIN, JUNHYONG KIM, BARBARA A. THOMSON, ALAIN VAUDOR, ROSALIND M. HARDING, and GUIDO BARBUJANI. Genetics and language in European populations, 157
SPIESBERGER, JOHN L., and KURT M. FRISTRUP. Passive localization of calling animals and sensing of their acoustic environment using acoustic tomography, 107
SRYGLEY, ROBERT B., and PENG CHAI. Predation and the elevation of thoracic temperature in brightly colored Neotropical butterflies, 766. See also PENG CHAI
STAMPS, JUDY A. The effect of contender pressure on territory size and overlap in seasonally territorial species, 614
———. When should avian parents differentially provision sons and daughters? 671
STAMPS, JUDY A., and V. V. KRISHNAN. The effect of settlement tactics on territory sizes, 527
STAUFFER, JAY R., JR. See KENNETH R. MCKAYE
STEPHENSON, NATHAN L. Climatic control of vegetation distribution: the role of the water balance, 649

TAYLOR, PETER D. Allele-frequency change in a class-structured population, 95. See also BERNARD J. CRESPI
THOMSON, BARBARA A. See ROBERT R. SOKAL
TRAVERS, STEVEN. See ANDREW SIH

VAUDOR, ALAIN. See ROBERT R. SOKAL

WARNER, ROBERT R. Resource assessment versus tradition in mating-site determination, 205
WILBUR, HENRY M. See PETER B. PEARMAN
WILBUR, HENRY M., and JOHN E. FAUTH. Experimental aquatic food webs: interactions between two predators and two prey, 176
WILSON, MARK V., and DANIEL B. BOTKIN. Models of simple microcosms: emergent properties and the effect of complexity on stability, 414

YOUNG, ANDREW L., ALISON F. RICHARD, and LESLIE C. AIELLO. Female dominance and maternal investment in strepsirhine primates, 473

Alphabetical Table of Contents of Titles

Adaptation and phylogeny as determinants of egg size in echinoderms from the two sides of the Isthmus of Panama. H. A. Lessios, 1
The adaptive significance of tree height. David A. King, 809
Allele-frequency change in a class-structured population. Peter D. Taylor, 95
Analysis of biological data when there are ordered expectations. Steven D. Gaines and William R. Rice, 310

Bower size and male reproductive success in a cichlid fish lek. Kenneth R. McKaye, Svata M. Louda, and Jay R. Stauffer, Jr., 597

Changes in population dynamics resulting from oviposition in a subdivided habitat. Peter B. Pearman and Henry M. Wilbur, 708
Climatic control of vegetation distribution: the role of the water balance. Nathan L. Stephenson, 649
The cost of biparental sex under individual selection. Curtis M. Lively and David G. Lloyd, 489

Development and quantitative genetics of correlation structure among body parts of *Drosophila melanogaster*. David E. Cowley and William R. Atchley, 242
Dispersal rates under variable patch den-

sity. Bernard J. Crespi and Peter D. Taylor, 48
The dynamics of host-parasitoid-pathogen interactions. M. E. Hochberg, M. P. Hassell, and R. M. May, 74

The effect of contender pressure on territory size and overlap in seasonally territorial species. Judy A. Stamps, 614
The effect of settlement tactics on territory sizes. Judy A. Stamps and V. V. Krishnan, 527
Estimating and testing the shapes of adaptive surfaces: the morphology and pollination of *Dalechampia* blossoms. W. Scott Armbruster, 14
The evolution of inflorescence size and number: a gamete-packaging strategy in plants. Daniel J. Schoen and Michelle Dubuc, 841
Evolution of obligate siblicide in boobies. 1. A test of the insurance-egg hypothesis. David J. Anderson, 334
The evolution of plasmids carrying multiple resistance genes: the role of segregation, transposition, and homologous recombination. Richard Condit and Bruce R. Levin, 573
Experimental aquatic food webs: interactions between two predators and two prey. Henry M. Wilbur and John E. Fauth, 176
An experimental study on the effects of predation risk and feeding regime on the mating behavior of the water strider. Andrew Sih, James Krupa, and Steven Travers, 284

Female dominance and maternal investment in strepsirhine primates. Andrew L. Young, Alison F. Richard, and Leslie C. Aiello, 473

Genetics and language in European populations. Robert R. Sokal, Neal L. Oden, Pierre Legendre, Marie-Josée Fortin, Junhyong Kim, Barbara A. Thomson, Alain Vaudor, Rosalind M. Harding, and Guido Barbujani, 157
Group selection by selective emigration: the effects of migration and kin structure. Alan R. Rogers, 398

Habitat segregation by sex in the hooded warbler: experiments on proximate causation and discussion of its evolution. Eugene S. Morton, 319
A hierarchical analysis of species' abundance patterns in grassland vegetation. Scott L. Collins and Susan M. Glenn, 633
How to test for proportionality in the reproductive effort of plants. Peter G. L. Klinkhamer, Tom J. de Jong, and Evert Meelis, 291

Life-history strategies for energy gain and predator avoidance under time constraints. Donald Ludwig and Locke Rowe, 686
Low nutritive quality as a defense against optimally foraging herbivores. Per Lundberg and Mårten Åström, 547

Measuring the effect of natural selection on phenotypic interaction systems. Bernard J. Crespi, 32
Models of simple microcosms: emergent properties and the effect of complexity on stability. Mark V. Wilson and Daniel B. Botkin, 414
Multiple-niche polymorphisms in plant populations. Kent E. Holsinger and Stephen W. Pacala, 301

On the evolution of reliable indicators of fitness. Richard E. Michod and Oren Hasson, 788
The optimal number of female flowers and the fruits-to-flowers ratio in plants under pollination and resources limitation. Dan Cohen and Reuven Dukas, 218

Passive localization of calling animals and sensing of their acoustic environment using acoustic tomography. John L. Spiesberger and Kurt M. Fristrup, 107
Path overcounting in indirect-effects analysis (Notice). Bernard C. Patten, 858
Perennation and the persistence of annual life histories. Gordon A. Fox, 829
Phenotypic selection on heritable size traits: environmental variance and genetic response. R. V. Alatalo, L. Gustafsson, and A. Lundberg, 464
Predation and the elevation of thoracic temperature in brightly colored Neotropical butterflies. Robert B. Srygley and Peng Chai, 766

Predation and the flight, morphology, and temperature of Neotropical rain-forest butterflies. Peng Chai and Robert B. Srygley, 748
Proximate determinants of sexual differences in adult body size. Richard Shine, 278

Reproductive competition and the evolution of work load in social insects. Paul Schmid-Hempel, 501
Reproductive efficiency and the timing of gestation and lactation in rodents. Douglas S. Glazier, 269
Resource assessment versus tradition in mating-site determination. Robert R. Warner, 205

Scale of investigation and the detection of competition: an example from the house sparrow and house finch introductions in North America. William A. Bennett, 725
The seed bank as a source of genetic novelty in plants. Donald A. Levin, 563
Sources of intraspecific variation in sperm precedence in red flour beetles. Sara M. Lewis and Steven N. Austad, 351
Spatiotemporal demographic processes in plant populations: an approach and a case study. Ronen Kadmon and Avi Shmida, 382
A stochastic theory of community food webs. V. Intervality and triangulation in the trophic-niche overlap graph. Joel E. Cohen and Zbigniew J. Palka, 435

Temporally concordant structure of a fish assemblage: bound or determined? Alfred W. Ebeling, Sally J. Holbrook, and Russell J. Schmitt, 63
Theoretical mechanics of particle capture: predictions for hydropsychid caddisfly distributional ecology. Catherine Loudon and Donald N. Alstad, 360

When should avian parents differentially provision sons and daughters? Judy A. Stamps, 671
